

South Rusholme Residents Association

Let's Keep It Tidy!

Throughout the latter part of 2007 **South Rusholme Residents Association** has carried out a number of consultations with local residents. It is clear from these discussions that there is widespread concern in the area about the issues of over-filled wheelie bins that are left on the pavement, fly-tipping, mouse infestation and poor uptake of recycling facilities. We believe that the vast majority of people in the local area do care about these issues and so we have produced this newsletter with the intention of providing residents with information which will enable all of us to do something about these problems:

Wheelie Bins

All wheelie bins should be put out on Wednesday evening and taken back to the appropriate property after emptying on Thursday.

Any problems with bins should be reported to the City Council Environment On Call on 954 9000.

Dumped Rubbish

Again this should be reported to the City Council Environment On Call on 954 9000.

Persistent offenders can also be reported on this number.

Pest Infestation

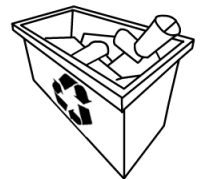

...has been reported as widespread within our local area. This is probably not unconnected to the large amount of dumped waste/overflowing bins.

City Council pest control is 234 4854. There is a charge for this service.

Recycling

The area has a low take up of the Kerb-it recycling scheme (the black boxes).

The boxes are available from Environment On Call on 954 9000.

Environment on Call

 **954 9000**

This council one-stop-shop service will help with everything from diseased trees to removing graffiti. The phone service is often busy so you may need to wait for an answer, but the staff are very friendly and helpful. Always be sure to note your job reference number in case you need to follow up the call.

South Rusholme Residents Association will continue to consult with local people regarding their concerns and raise issues with Ward Councillors and local authorities as appropriate. If you are interested in taking part in making our area a better and safer place to live then we can be contacted c/o/ Private sector Housing on 234 5131 or at Simon.holden4@ntlworld.com. You do not have to be a member of the Residents Association to use these public phone numbers. Manchester City Council openly welcomes all contributions towards improving the area.
